Description

The "Attribute editor" tool doesn't work. If I activate such tool and click on a whatever feature, a warning message appears. Here's an extract from the gvSIG.log:

```
WARN AWT-EventQueue-0 org.gvsig.fmap.mapcontrol.tools.Listeners.AttributeEditorPointListener - Can't show attribute information from point on the layer regioni
org.gvsig.featureform.swing.CreateJFeatureFormException: Exception creating JFeatureForm.

Con el build 2420 no puedo reproducirlo, por lo menos con las capas que uso habitualmente.

¿ Puedes ver de darme alguna pista mas ?

I've tried with several layers (for instance, [Req2011 ED50](#)), but it continues to do not work at least on win x64 with Java 8.
