

Application: gvSIG desktop - gvSIG bugs #4176

Styling of layer affects also other selected layers

03/16/2016 12:50 PM - Andrea Antonello

gvSIG version:	2.3.0	Add-on build:	
gvSIG build:		Add-on resolve version:	
Operative System:		Add-on resolve build:	
Keywords:		Proyecto:	
Has patch:		Hito:	
Add-on name:	Unknown		

Description

To reproduce follow the steps:

- load a layer A and a layer B, both of polygon type
- select layer A (so that the name is bold)
- double click on the legend of layer B to open the Symbol Selector
- change the fill color and apply/accept

The result is that the fill of both the layer B and A are changed to the inserted.

I think it should either:

- not be possible to open the Symbol Selector for unselected layers

or:

- the style should be applied only to the double-clicked layer (which I think is what the user expects).

History

#1 - 03/16/2016 03:53 PM - Antonio Falciano

- Target version set to 2.3.0-2429 (rev. org.gvsig.desktop-2.0.135, NOT USABLE)
- Status changed from New to Invalid

Hi Andrea,

this is a duplicate ticket of #3082, #3035, #1980 and #256 ...so I have to set it as Invalid.

Note that Daniel Martinez has submitted a patch (#3035#note-11) to be applied in gvSIG 2.4.

#2 - 03/16/2016 03:54 PM - Andrea Antonello

Thanks Antonio, I will have to find a way to be better uptodate with the issues.

#3 - 03/16/2016 04:07 PM - Antonio Falciano

No problem, Andrea. IMHO this issue is one the most tedious ones.
