Description			
It would be nice to have a different icon for Jython geoprocesses in the Toolbox, just like models and BeanShell scripts.

- Target version changed from 2.3.0-2447-final (rev. org.gvsig.desktop-2.0.153) to 2.3.0-2439 (rev. org.gvsig.desktop-2.0.145)
- Assignee set to Joaquín del Cerro Murciano
- Status changed from New to Fixed

Hola,

he añadido algo, que aunque no es exactamente lo mismo que pides creo puede ser suficiente.

He hecho que si un geoproseso implementa el interface HasIcon:

```
package es.unex.sextante.gui.core;

import javax.swing.ImageIcon;

public interface HasIcon {
    public ImageIcon getIcon();
}
```

La toolbox use el metodo getIcon() para obtener el icono para ese geoproseso.

Esto permitira que cada geoproseso pueda especificar su propio icono.

Hi Joaquín,

the basic idea could be to set the icon e.g. in the defineCharacteristics function (or hard code it directly in gvsig.libs.toolbox). For instance:

```
def defineCharacteristics(self):

    self.setName("My algorithm")
    self.setGroup("My algorithms")
    self.setIcon(imagelcon) #javax.swing.ImageIcon

    params = self.getParameters()
    # ...
```

Will it be possible in this way? Thanks in advance.

Could you test in the last builds?

#4 - 08/23/2016 01:07 PM - Antonio Falciano

To test it simply execute the `proceso_desplazamientoxy.py` example. Result: the icon of "Prueba desplazamiento in X e Y" is the same of other geoprocesses in the latest builds, so the feature request is not satisfied yet. AFAIK there's not a `setIcon` method yet or a new icon for Jython geoprocesses hard coded in `gvsig.libs.toolbox`.
