Has patch:		Hito:	
Add-on name:	Unknown		

Description

Sometimes If I try to execute win64 gvSIG portable double-clicking on the gvsig-desktop.vbs file, the following error appears:

vbs_error.png

The error is due to the second row of gvsig-desktop.vbs:

```
shell.CurrentDirectory = "${INSTALL_PATH}"
```

In fact, `${INSTALL_PATH}` doesn't exist on Windows. I suggest to replace it with:

```
shell.CurrentDirectory = CreateObject("Scripting.FileSystemObject").GetParentFolderName(Wscript.ScriptFullName)
```
