gvSIG build:	2441	Add-on resolve version:	
Operative System:	Windows	Add-on resolve build:	
Keywords:		Proyecto:	
Has patch:		Hito:	
Add-on name:	Unknown		

Description

When we execute gvSIG double-clicking on the gvsig-desktop.cmd file on Windows, the console reports that `${INSTALL_DRIVE}` is not recognized and it's impossible to find a specified path (i.e. `${INSTALL_DRIVE}`). Fortunately is not a blocking issue.

gvsig-desktop.cmd_warn.png

I suggest to brutally simplify the content of gvsig-desktop.cmd batch script as:

```
@echo off
busybox sh gvSIG.sh
```

refs #4317 y #4173. Corregido para que al generar la portable se expandan correctamente las variables que expande el instalador del IzPack.

History

#1 - 08/21/2016 11:17 AM - Joaquín del Cerro Murciano

Parece un problema del instalador, ya que esas variables deberían sustituirse por sus valores correspondientes en el momento de la instalación.

Al Izpack se le indica:

```
<pack name="gvSIG desktop commons windows" required="yes">
<description>Core common files for Windows platforms</description>
<file src="{product.folder}/gvsig-package-installer.cmd" targetdir="{INSTALL_PATH}">
```

```
<file src="{product.folder}/gvsig-desktop.cmd" targetdir="$INSTALL_PATH"/>
<file src="{product.folder}/gvsig-desktop.vbs" targetdir="$INSTALL_PATH"/>
<file src="busybox.exe" targetdir="$INSTALL_PATH"/>
<file src="cygcheck.exe" targetdir="$INSTALL_PATH"/>
<parsable targetfile="$INSTALL_PATH/gvsig-package-installer.cmd"/>
<parsable targetfile="$INSTALL_PATH/gvsig-desktop.cmd"/>
<parsable targetfile="$INSTALL_PATH/gvsig-desktop.vbs"/>
</pack>
```

De forma que el Izpack, para los dos cmd y el vbs, deba sustituir esas variables.

Cuando pueda lo mirare.

Lo de quitar las líneas esas del cmd no he sido del todo correcto ya que si se ha instalado en una unidad distinta a la C no funciona. Por eso se añadieron.

Hola Antonio,

por un correo en la lista me he dado cuenta de un error que puede estar relacionado con este.

A un usuario le pasa lo mismo. Esta ejecutando la portable. En la portable no se realizan las sustituciones del instalador ya que no hay instalador.

¿ A ti te pasa en la portable o en una instalación normal ?

#6 - 08/24/2016 12:10 PM - Antonio Falciano

Hi Joaquín,

this issue happens in the portable, also in build 2442.

#7 - 08/25/2016 11:17 AM - Joaquín del Cerro Murciano

- Target version changed from 2.3.0-2447-final (rev. org.gvsig.desktop-2.0.153) to 2.3.0-2443-RC3 (rev. org.gvsig.desktop-2.0.150)

- Subject changed from gvsig-desktop.cmd: \${INSTALL_DRIVE} is not recognized to gvsig-desktop.cmd: \${INSTALL_DRIVE} is not recognized (in the portable)

#8 - 08/25/2016 02:37 PM - Joaquín del Cerro Murciano

- Target version changed from 2.3.0-2443-RC3 (rev. org.gvsig.desktop-2.0.150) to 2.3.0-2447-final (rev. org.gvsig.desktop-2.0.153)

- Assignee set to Joaquín del Cerro Murciano

- Status changed from New to Fixed

#9 - 08/25/2016 02:41 PM - Joaquín del Cerro Murciano

#10 - 08/31/2016 11:58 AM - Antonio Falciano

The issue persists only in the console in RC4, there's not trace in the gvSIG-launcher.log but the gvSIG Installation folder is correctly found, so it's not a blocking issue, but only a cosmetic one.
