Description

When using the "Reproject" tool from gvSIG Geoprocesses, the generated .prj for the output layer contains the original CRS definition, not the definition of the output CRS.

Hi Cesar,

this ticket is duplicated of #4183 and related to #2539. So I'd set this ticket as Invalid (because duplicated) and reopen #4183 (because different from #2539, but related to it).

#2 - 08/18/2016 07:18 PM - Cesar Martinez Izquierdo

- Related to gvSIG bugs #4183: PRJ file when using "Reproject" geoprocess is created with the origin CRS added

#3 - 08/18/2016 07:19 PM - Cesar Martinez Izquierdo

- Status changed from New to Invalid

Duplicated of #4183 as reported by Antonio.
