Description			
The links for getting API keys in the Webmaps tab are not active (at least on Windows). The cursor changes on hover, but clicking on links doesn't open a browser page. Finally the user is forced to copy and paste the URLs in his browser manually.

- Status changed from Fixed to New

Sorry but I have to reopen the ticket, because the two links in the Webmaps tab of Add layer open **three** tabs on my default browser (Mozilla Firefox). Furthermore the link in "Google Stret View" preferences is not working.

The links work fine in build 2445 even if there's another issue (#4371).
