Description

We get an error at the layout following these steps:

- We create a new project, with a view, and a vector layer.
- We create a layout with that view.
- We save the project (keeping active the layout).
- We create a new empty project without closing gvSIG.
- We create a view and we add a different vector layer than the previous one.
- Without saving the project, we open the first project.
- Then the layout appears with the layer of the second project.

Associated revisions

Revision 43293 - 06/07/2017 09:47 AM - Francisco Díaz Carsí

refs #4394 Assigned a new empty project before loading a new one so that the project to be loaded does not collect references from the existing project.
