Description

We get an error when we create a New User CRS, and it can't be created.

I attach log file

Hi Mario,

I can reproduce the error. In the meanwhile, I can suggest a workaround: edit the `plugins\org.gvsig.projection.app\jcrs\db\usr.script` file, adding a new INSERT statement manually. It's not simple for basic users, but it works. For instance, I have added some User CRSs in my `usr.script` file and they are read correctly. Hope this helps.

- Target version set to 2.3.1-2500 (rev. org.gvsig.desktop-2.0.155)

It was due to my patch in #4288. I've just attached a revised version of it that solves the issue.

I hope the fix will be applied in gvSIG 2.3.1.
