

Application: gvSIG desktop - gvSIG bugs #4428

Not error is shown when closing edition in a postgis layer that can not be saved with null values

11/10/2016 12:58 PM - Francisco Puga

gvSIG build:		Add-on resolve version:	
Operative System:		Add-on resolve build:	
Keywords:		Proyecto:	
Has patch:		Hito:	
Add-on name:	Unknown		

Description

This is a very annoying behavior for the users. Related to #4010

Steps to reproduce:

1. Create a postgis layer like:

```
CREATE TABLE foo (  
  gid SERIAL primary key,  
  name text NOT NULL,  
  geom geometry(point, 4326)  
);
```

2. Load the layer in gvSIG

3. Open edition and insert a point (do not insert alphanumeric data)

4. Close edition, saving

The layer is still in edition mode, and no error is shown to the user. Neither a pop-up, neither in the status bar. The log shows the correct error:

```
org.gvsig.vectorediting.lib.api.exceptions.EndEditingException: An error has been produced ending edition.
