Description

It would be interesting to add the "New View" option at the View menu (from the View). At this moment the user has to access to the Show->Project manager menu, then View document and then "New".

It would be very useful to add that option at the "View" menu directly when the user is in another View.

- Tracker changed from gvSIG bugs to gvSIG feature requests

- Status changed from New to Won't fix

Esto rompería la dinámica de que cada menú indica el elemento sobre el que actúa. En el menú Vista deben estar las herramientas que aplican sobre esa Vista. Quizá se podría añadir la opción en otro lado, es un tema a pensar un poco. De momento este FR lo paso a won't fix.
