#### Description

Steps in order to reproduce the error:

- create and open a view in EPSG:4326;
- add a PostGIS layer defined in a different CRS than the view (e.g. EPSG:23032) as a first layer;

Results:

- an "Unable to reproject envelope with transf" error happens;
- the view is not zoomed to the layer extent;
- zooming to the layer extent, the layer is where it should be.
