Description

If I install gvSIG 2.4 setting Italian as language the installer i18n strings are not translated, except those of the buttons (thanks to #1532):

The i18n strings are translated in English in build 2838, even if I've set Italian as language in the installation. Maybe the *.properties files of org.gvsig.installer.app.mainplugin should be available for all the languages available for the installer at least. They could be extracted from the gvSIG-desktop-2.4.0-2838\i18n\translations.all folder.

Que esten disponibles las traducciones a otros idioma a demas del ingles y el español puede ser complicado.

Durante ese momento de la instalacion, aun no se han extraido los archivos de "translations-all", ni de "org.gvsig.app.mainplugin".

Creo que la forma mas simple de añadir esas traducciones serie metiendolas en "i18n/andami" o en el jar "org.gvsig.installer.swing.impl-*.jar".

si no me equivoco las que se han añadido nuevas son:

```
_Install_required_addons=Install required addons
_Installing_prerequisites_three_dots=Installing prerequisites...
_Cant_install_package=Can't install package
_Loading_packages=Loading packages
```

Si me pasas las de italiano las metere para el proximo build.

Ok, these are the above strings in Italian:

```
_Install_required_addons=Installazione dei pacchetti obbligatori
_Installing_prerequisites_three_dots=Installazione dei prerequisiti...
_Cant_install_package=Non \u00E8 possibile installare il pacchetto
_Loading_packages=Caricamento dei pacchetti
```

Sorry for the waste of time.

I've just checked in RC2 and it seems that other strings are needed:

gvsig_package_installer=Installatore di pacchetti di gvSIG
_select_installation_mode=Seleziona modalit\u00E0 di installazione
_advanced_installation=Installazione avanzata
_typical_installation=Installazione tipica
_progress=Avanzamento
_Install_package=Installazione dei pacchetti
_finished=Terminato
