Add-on name:	Unknown		

Description

1. Create a link between layer 1 and layer 2.

2. Check that when you select a record from layer 1, one or more records of layer 2 become selected.

3. Then create a link between layer 2 and layer 1.

4. The selection of records doesn't work as expected. The selection should work in both directions but it just doesn't work in any direction.

I'm attaching two simple layers for your convenience.

History

#1 - 03/04/2020 11:56 AM - Álvaro Anguix

- Status changed from New to Won't fix

Los links deben funcionar de forma unidireccional, para no crear bucles.
