gvSIG build:	2045	Add-on resolve version:	
Operative System:	Linux	Add-on resolve build:	
Keywords:		Proyecto:	
Has patch:	No	Hito:	
Add-on name:	Tools: Geometry editing (org.gvsig.editing)		

Description

Hi,

I did the following steps:

1. start editing,
2. edit some geometries,
3. Finish editing sesion, select "Continue editing"
4. edit another geometry,
5. Finish the editing session, select Don't save changes.
6. Start editing session again,
7. the edition tools in the menu bar are not active (unless copy, rotate and scale).

It is impossible to continue editing.

I attach an image which shows the tools unactive.

After that I tried to apply one of the 3 possible tools (copy, rotate and scale) and the console appears. I attach the log file.

Thanks!

I have been trying many times to reproduce the error but I haven't been unable to do so.

Maybe it is related to the edition tools being used, or the layer type, don't know.

Would you mind trying to reproduce it again and give me the steps performed, as well as the data source being edited, just in case?

#6 - 04/24/2012 04:00 PM - Victoria Agazzi

I tested the same steps in the builds 2045 and 2046, with the same shp layer and the problem do not happen again. Maybe it has to do with the editing tools used, but I don't remember which one I used! when I opened the ticket. Sorry.

Viqui-

- Status changed from Awaiting response to Closed

Don't worry, I'm going to close the ticket and we can reopen it if the error raises again.
