Has patch:		Hito:	
Add-on name:	Unknown		

Description

For example connecting to http://85.18.173.22:8080/DbMAP_WMS/CTR2000/WMSservlet with a space at the end (as copied from a webpage) makes it possible to connect and select the layer and format, but then breaks when it is time to add the layer.

It would be good to make a trim of trailing whitespaces and/or at least give the user a message. At the moment only the log makes it visible.

Log below:

```
