Description

When we run the field calculator and we run the "X" operator to calculate the "X" coordinate, all the values are filled in with "Y" coordinate.

The "Y" operator works good.

Cuando ejecutamos la calculadora de campos para calcular la coordenada X con dicho operador, nos rellena todos los valores con la coordenada Y.

El operador Y funciona correctamente.

- Status changed from New to Fixed

El error esta en una de las librerias del core de gvSIG.

Si se quiere sacar una actualizacion para la 2.4.0 habria que hacer algun malabar.
