Description

Durante el arranque falla el script SelectTableDuplicates a la hora de importar h2 por que no encuentra el paquete.

```
WARN 42341 [Thread-9] (ScriptingUtils.java:475) - Can't execute autorun from
'/home/jjdelcerro/gvSIG-desktop/gvSIG-desktop-2.6.0-3205-devel-lin-x86_64/preferences/gvSIG/plugins/org.gvsig.scripting.app.mainplugin
.mainplugin/2.6.0/scripts/addons/SelectTableDuplicates/autorun.inf'
```

```

ImportError: No module named h2
```

```
  at org.python.core.Py.ImportError(Py.java:334)
  at org.python.core.imp.import_logic(imp.java:913)
```

Seguramente sera por el cambio de nombre del plugin de h2spatial. Habria que ver de actualizar el "use_plugin".

Lo mas correcto seria dejar de usar directamente h2, quitando el use_plugin, y ver si es viable utilizar el api de DAL, llamando a `dataManager.createLargeMap()` o `dataManager.createLargeSet()`.
