<b>Operative System:</b>	Windows	<b>Add-on resolve version:</b>	
<b>Keywords:</b>	gvp	<b>Add-on resolve build:</b>	
<b>Has patch:</b>	No		

#### Description

Steps to get the error:

1. unzip gvSIG-1.12 build and open,
2. change EPSG to 23029 and create a new view
3. add a "MDT" layer and adjust some raster parameters (eliminar colas, etc.)
4. save as foo.gvp and close
5. open gvsig and open foo.gvp get an error (log attached).

#### History

##### #1 - 05/02/2012 12:27 AM - Francisco Puga

- Target version deleted (1.12.0-rc1)

AFAIK, is not an error exactly related with 1.12 version. This is a known error of gvSIG. So with the given resources assigned to gvsig 1.12 and the need to release the new version ASAP i will go remove the "target version"

Nacho, write a comment if you don't agree with the decision and we can discuss it.

##### #2 - 01/15/2014 12:20 PM - Álvaro Anguix

- Project changed from Application: gvSIG desktop to | gvSIG desktop 1

- Category deleted (Application)
