Description

Sometimes, when starts applications fails on Libraries Initialization:

From error.log file:

```
11:01:18,735 INFO [db.DBStoreLibrary.postInitialize()]
  Postinitializing library 'org.gvsig.fmap.dal.store.db.DBStoreLibrary'.
Exception in thread "main" Error importing classes from file at line 13 column 60. Can't locate DynClass
'Persistence:DBResourceParameters. Look at the extends tag.

```

But, other works perfectly (*see work.log file*).

This appears as a library loading order problems with DAL db project (Library Service order).

Another good thing to do is sort all libraries, always in the same order, before resolve dependencies. This will make early detection of library loading problems (always fails in the same way or never fails).
