Description

In class WizardDB.java, there is a TODO comment:

```
// TODO: use the mode to filter tables with geometries when opening
// a view document
List parameters = dbExplorer.list();
```

That makes all tables in the scheme be available for the user to select.

A possible workaround for this would be:

```
int mode = DBServerExplorer.MODE_ALL;
    if (this instanceof WizardVectorialDB) {
        mode = DBServerExplorer.MODE_GEOMETRY;
    }
    List parameters = dbExplorer.list(mode);
```

I've made and tested the change and it works as I expected.

- Status changed from New to Fixed

gvSIG-desktop:r38920

List tables in DBServerExplorer.MODE_GEOMETRY mode when we deal with GeoDB layers

Added filter suggested by Ildfonso Junquero inside a little method which is overridden by subclass.

Test: Access a DB with geo data (PostGIS, Oracle Spatial) and check that only tables with geographic info are listed.

#4 - 10/01/2012 10:08 AM - Joaquín del Cerro Murciano

- *Target version changed from 2.0.0-rc1 to 2.0.0-devel-2055*

#5 - 10/17/2012 10:08 AM - Vicent Domenech

- *Status changed from Fixed to Closed*

Using gvSIG version 2056 (beta 1)
