Add-on version:	2.0.0		

Description

When installing from URL, the downloading process shoud start automatically after sellecting the packages and pressing "next", as this is what the user expects. Instead of this, there is a "start_download" button.

History

I'm agree with Manuel. Furthermore the install process should also start automatically when the download is finished, without clicking on the Next button one more time. Too many clicks are annoying for the users.

#2 - 06/12/2017 02:14 PM - Álvaro Anguix

- Target version set to 2.4.0-2822 (rev. org.gvsig.desktop-2.0.188)

- Status changed from New to Closed

In the new installer works as Manuel said
