Description

Hi,

I added a .dgn layer to a view. When I tried to open the Properties windows, a warning message appears. I attach print.

If I accept the warning, the Property windows opens, but an error console appears. I attach print.

I used the files /mnt/data/gvSIG_datos/870/87031/t87031.dgn and /mnt/data/gvSIG_datos/dgn/cv_300_todo.dgn for the test. If you need them, please, ask me.
