gvSIG version: 1.12.0	Add-on version:
gvSIG build: 1413	Add-on build:
Operative System: Windows	Add-on resolve version:
Keywords: installjammer, installation, setup	Add-on resolve build:
Has patch: No	

Description

As in subject. How to reproduce this issue:

1. change temporarily the name of Java folder in order to "hide" it;
 2. execute the gvSIG desktop 1.12 RC1 setup and go on until it seems that it's downloading some files;
 3. after few seconds, an empty window (with default title, subtitle, text, etc.) appears;
 4. clicking on the Next button, the setup tries to download some files and the empty window appears again cyclically.
- Finally, I had to cancel the setup to exit from the installation.

History

#1 - 08/03/2012 05:48 PM - Antonio Falciano

- Target version set to 1.12.0-final

#2 - 08/28/2012 06:33 PM - Francisco Puga

- Status changed from New to Fixed

- Assignee set to Francisco Puga

Thanks for the report. I just fixed it.

#3 - 02/20/2014 10:21 AM - Álvaro Anguix

- Project changed from Application: gvSIG desktop to | gvSIG desktop 1

- Target version deleted (1.12.0-final)
