

Application: gvSIG desktop - gvSIG bugs #975

Can't choose the packages of a specific gvSIG build number in the installation from URL

08/09/2012 04:49 PM - Manuel Madrid

Status: Closed	% Done: 0%
Priority: Urgent	Spent time: 0.00 hour
Assignee: Joaquín del Cerro Murciano	
Category:	
Target version: 2.0.0-devel-2052	
Severity:	Add-on version:
gvSIG version: 2.0.0	Add-on build:
gvSIG build: 2049	Add-on resolve version:
Operative System: Linux	Add-on resolve build:
Keywords:	Proyecto:
Has patch: No	Hito:
Add-on name: Unknown	

Description

1. Install gvSIG 2.0 2049 from the online distribution.
2. Click on the "from URL" combo box.
3. You should be able to choose the packages of 2049 build number but they are not available in the list.
4. If you choose the default option they will be installed some packages of 2050 build number, which are incompatible, making gvSIG crash.

As you can see in the attached images, the list of this combo box that you get in the installation is different than the one you get in the add-ons manager of gvSIG.
